Work Experience

Web Developer

DXC FDS | 02/09/2024 - Current | Leon, Spain

Full time job, responsible of API development using SpringBoot for CaixaBank.

My tasks include:

- Generating Swagger contracts for endpoint development.
- Maintenance of legacy code.
- Validating contracts using Spectral to ensure compliance with standards.
- Connecting to databases to ensure efficient data persistence and retrieval.
- Developing automated tests with Mockito and JUnit to ensure correct endpoint functionality.
- Performing code quality analysis and detecting code smells using SonarQube.
- Generating automatic API documentation using Newman.

Web Developer

Mi tienda de Arte | 15/03/2022 - 15/02/2024 | Santa Olaja de la Ribera, Spain

Full time job, led the development of internal e-commerce web applications

Tasks and responsibilities:

- Designed and implemented backend solutions using Laravel, Symfony, and NestJS.
- Developed responsive frontend interfaces with Vue.js.
- Built and maintained small-scale desktop applications using .NET 6.
- Integration of RabbitMQ and Amazon SQS for backend-to-backend communication.
- Sysadmin for Linux and Windows servers, managing automated CI/CD pipelines through GitLab and Docker for applications built with Node.js, PHP, and C#.
